West Wits Mining Presentation

Australian Gold Conference | Sydney 2026

West Wits Mining Ltd (ASX: WWI) (OTCQB: WMWWF)("West Wits" or "**the Company**") advises that the Company's Executive Team will attend the Australian Gold Conference in Sydney, Australia, running from Tuesday, 13 October 2026 to Thursday, 15 October 2026.

CEO & Managing Director Rudi Deysel will be presenting at the conference on **Thursday, 15 October at 2:30pm AEDT**. Rudi will provide an update on the Company's progress at the Qala Shallows Project on Johannesburg's Witwatersrand Goldfield. We look forward to connecting with investors and industry stakeholders throughout the conference and other Sydney roadshow events.

An updated Investor Presentation is attached to this announcement.

ABOUT WEST WITS MINING LIMITED

West Wits Mining Limited (ASX: WWI) (OTCQB: WMWWF) is focused on the exploration, development and production of high-value precious and base metals for the benefit of shareholders, communities and environments in which it operates. Witwatersrand Basin Project, located in the proven gold region of Central Rand Goldfield of South Africa, boasts a 7.24Moz gold project at 4.00g/t[1]. The Witwatersrand Basin is a largely underground geological formation which surfaces in the Witwatersrand. It holds the world's largest known gold reserves and has produced over 1.5 billion ounces (over 40,000 metric tons), representing about 22% of all the gold accounted for above the surface.

1. The original report was "2.2Moz Increase to WBP Global Resource Estimate to 7.24Moz " which was issued with consent of the Competent Person, Mr Hermanus Berhardus Swart. The report was released to the ASX on 02 February 2026 and can be found on the Company's website (https://westwitsmining.com/). Comprising 14.08MT at 4.40g/t for 1.99Moz Measured, 15.55MT at 4.04g/t for 2.02Moz Indicated and 26.81MT at 3.75g/t for 3.23Moz Inferred. The Company is not aware of any new information or data that materially effects the information included in the relevant market announcement and, in the case of Mineral Resources or Ore Reserves, that all material assumptions and technical parameters underpinning the estimates in the relevant market announcement continue to apply and have not materially changed. The form and context in which the Competent Person's findings are presented have not been materially modified from the original market announcement.

Forward-looking Statements

This presentation includes “forward-looking statements” as that term within the meaning of securities laws of applicable jurisdictions. Forward-looking statements involve known and unknown risks, uncertainties and other factors that are in some cases beyond West Wits Mining Limited’s control. These forward-looking statements include, but are not limited to, all statements other than statements of historical facts contained in this presentation, including, without limitation, those regarding West Wits Mining Limited’s future expectations. Readers can identify forward-looking statements by terminology such as “aim,” “anticipate,” “assume,” “believe,” “continue,” “could,” “estimate,” “expect,” “forecast,” “intend,” “may,” “plan,” “potential,” “predict,” “project,” “risk,” “should,” “will” or “would” and other similar expressions. Risks, uncertainties and other factors may cause West Wits Mining Limited’s actual results, performance, production or achievements to differ materially from those expressed or implied by the forward-looking statements (and from past results, performance or achievements).

These factors include, but are not limited to, the failure to complete and commission the mine facilities and related infrastructure in the time frame and within estimated costs currently planned; variations in global demand and price for gold fluctuations in exchange rates between the U.S. Dollar, South African Rand and the Australian Dollar; the failure of West Wits Mining Limited’s suppliers, service providers and partners to fulfil their obligations under construction, supply and other agreements; unforeseen geological, physical or meteorological conditions, natural disasters or cyclones; changes in the regulatory environment, industrial disputes, labour shortages, political and other factors; the inability to obtain additional financing, if required, on commercially suitable terms; and global and regional economic conditions. Readers are cautioned not to place undue reliance on forward-looking statements. The information concerning possible production in this announcement is not intended to be a forecast. They are internally generated goals set by the board of directors of West Wits Mining Limited. The ability of the Company to achieve any targets will be largely determined by the Company’s ability to secure adequate funding, implement mining plans, resolve logistical issues associated with mining and enter into any necessary off take arrangements with reputable third parties. Although West Wits Mining Limited believes that its expectations reflected in these forward-looking statements are reasonable, such statements involve risks and uncertainties and no assurance can be given that actual results will be consistent with these forward-looking statements.

The production target and financial forecasting reported under the Qala Shallows Definitive Feasibility Study (DFS) contain inferred mineral resources. The directors confirm that it is reasonable to include these inferred mineral resources having regard to the location and geology of the project in the well understood and researched structure of the Witwatersrand Basin and the views provided to WWI by independent geological expert consultants.

Competent Person Statements

The original report was “Updates to DFS provide Improved Results for WBP” which was issued with consent of the Competent Person, Mr. Andrew Pooley. The report was released to the ASX in July 2025 and can be found on the Company’s website (https://westwitsmining.com/). The Company is not aware of any new information or data that materially effects the information included in the relevant market announcement and, in the case of Mineral Resources or Ore Reserves, that all material assumptions and technical parameters underpinning the estimates in the relevant market announcement continue to apply and have not materially changed. The form and context in which the Competent Person’s findings are presented have not been materially modified from the original market announcement.

The original report was “2.2Moz Increase to WBP Global Resource Estimate to 7.24Moz” which was issued with consent of the Competent Person, Mr Hermanus Berhardus Swart. The latest report was released to the ASX on 2 February 2026 and can be found on the Company’s website (https://westwitsmining.com/). Comprising 14.08MT at 4.40g/t for 1.99Moz Measured, 15.55MT at 4.04g/t for 2.02Moz Indicated and 26.81MT at 3.75g/t for 3.23Moz Inferred. THE INVESTMENT CASE

Why West Wits Mining Now

01

Producing Gold Today

First gold poured in March 2026

Qala Shallows in production & ramping up

2027: 10,000 oz – 15,000 oz

2028: 42,500 oz[1]

2029: 70,000 oz (steady-state)[1]

02

Low Cost, High Margin

DFS AISC of **US$1,289/oz**[1] versus gold price above US$4,000/oz supports compelling operating margins.

03

Fully Funded to Steady State

~A$97M Absa/Nedbank package; second senior debt drawdown of **~A$21M** received Oct-2026, funding the path to steady state.

04

Blueprint for Growth

Funded to a **70koz p.a. steady state**[1], with a scoping study outlining potential to scale across a **7.24Moz Au base**[2].

05

Additional Commodity Upside

Bird Reef Central adds a **Uranium–Gold** exposure & further development optionality.

06

Tier 1 Gold Jurisdiction

A strategic position in the **Witwatersrand Basin (~22% of all gold ever mined)** supported by established infrastructure & skilled labour capability.

1. Updated Qala Shallows DFS – "Updates to DFS provide Improved Results for WBP" (ASX, 23 July 2025). Production target includes Inferred Mineral Resources – see disclaimer.
2. "2.2Moz Increase to WBP Global Resource Estimate to 7.24Moz" (ASX, 2 February 2026).

THE OPPORTUNITY

Australian Capital Unlocking a Mispriced South African Gold Asset

West Wits has used Australian capital markets to develop a high-grade Witwatersrand asset that was overlooked by the local market.

A Mispriced Asset

A shallow, high-grade Witwatersrand orebody overlooked as major South African miners shifted toward offshore & deeper assets.

The Right Capital Market

The ASX understands early-stage risk, funding development earlier than most markets & provided access to development capital earlier than traditional local markets, enabling Qala Shallows to advance into production.

Improving South African Backdrop

The Government of National Unity, with the Minerals Council & forums like the Junior Indaba in Joburg - is moving towards policy reform, renewed mining investment & easier access for foreign capital are improving the operating & investment environment.

Value Creation on Both Sides

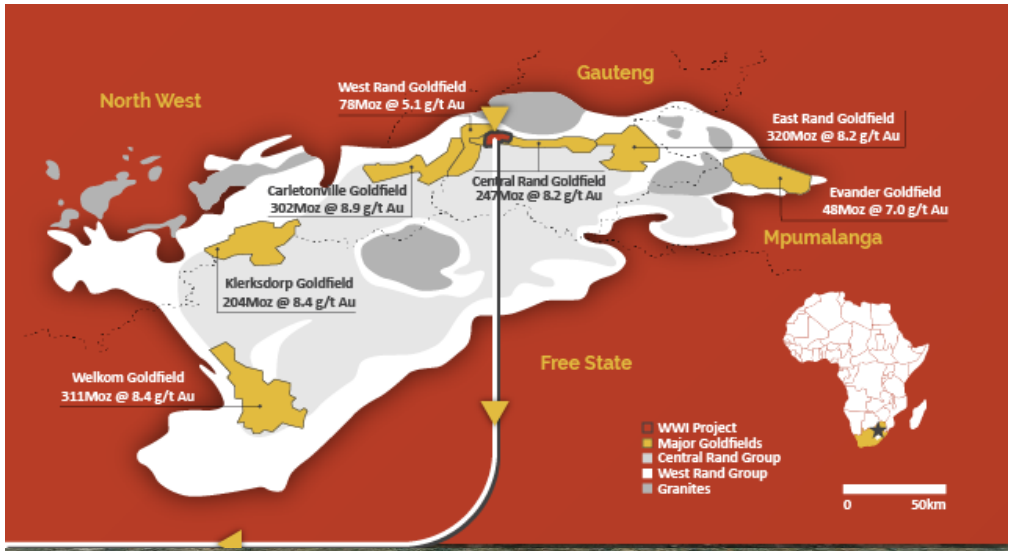

Australian capital unlocks an overlooked high-return SA asset: West Wits gains production & scale, while South Africa benefits from investment, jobs & economic activity.

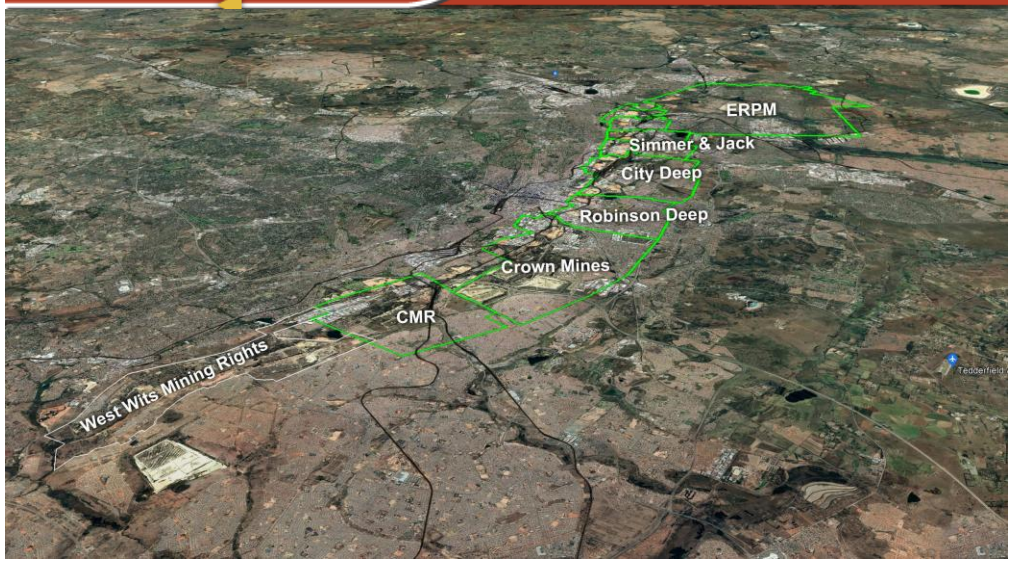

The Witwatersrand Basin

For personal use only

West Wits sits in the Central Rand, with established infrastructure, adjacent operations & access to both brownfield & greenfield development potential.

~22%	of all gold ever mined has come from the Witwatersrand basin
>1.5 bn oz	of historic production - over 40,000 tonnes
Central Rand Location	positioned alongside established gold operations
Brownfield + Greenfield Potential	refurbished infrastructure plus a new decline into virgin ground

THE FINANCIAL CASE

Qala Shallows - High Margins, Strong Returns At Conservative Gold Assumptions

DFS[1] economics based on US$2,850/oz gold price assumption, well below current spot, highlighting strong operating leverage & downside resilience.

US$2.7bn	US$983M	US$500M	81%
LIFE-OF-MINE REVENUE	FREE CASH FLOW	POST-TAX $NPV_{7.5}$	POST-TAX IRR

US$1,289/oz AISC[1] versus ~**US$4,100/oz** spot gold price

~US$200 million annual margin: 70,000 oz p.a. @ USD 4,100/oz gold price before corporate costs, finance, tax & other adj.

Robust across the gold cycle

35% post-tax IRR[1] at US$1,850/oz gold price, with downside protection from put options covering ~50% of production at ~US$3,500/oz through construction.

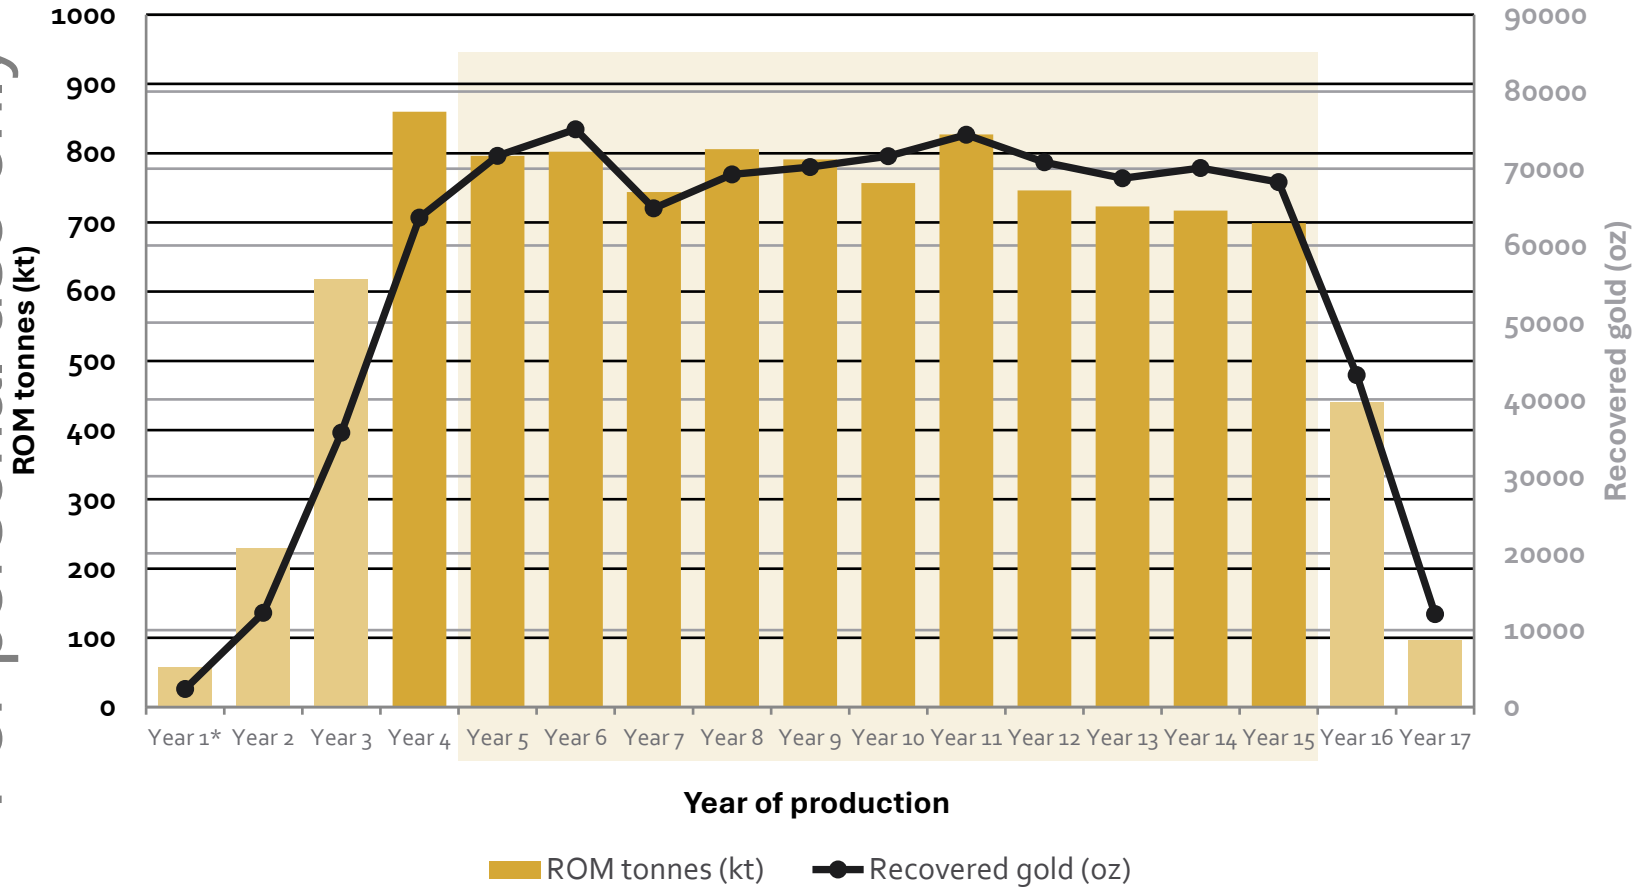

Underpinned by: US$1,289/oz AISC (LoM) · US$1,181/oz AISC (steady state) · 8-month payback · 17-year mine life

THE PATHWAY TO STEADY-STATE PRODUCTION

Fully Funded and On Schedule to 70,000 oz p.a.

Key Milestones remain on track following receipt of the second senior debt drawdown (ASX, 7 October 2026).

Oct 2026 · ACHIEVED

Second drawdown
R236M (~A$21M) received; fully funded to steady state

Feb 2027

Stoping Commences
Primary production from stoping via 2 Level access

Q3 2027

Surface Infrastructure
Critical surface infrastructure complete, supporting peak production rates

Q4 2027

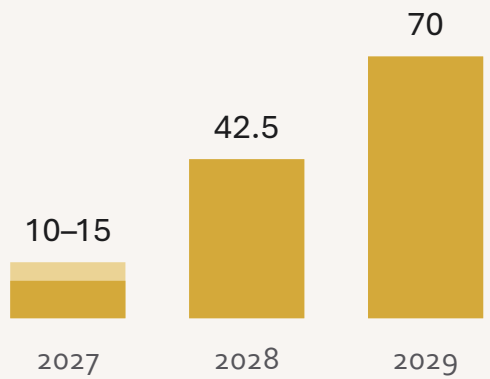

Commercial Production
Achieve free cashflow from operations

Q1 2029

Steady State[1]
70,000oz p.a. from ~840ktpa ore

PRODUCTION RAMP-UP[1]

Recovered Gold Outlook (koz)

Stoping from Feb-27
drives the step-up from development ore to primary production.

70,000 oz p.a.[1]
steady-state rate from Q1 2029, tied to stoping, surface infrastructure & bulk power.

SURFACE INFRASTRUCTURE

61% Completed

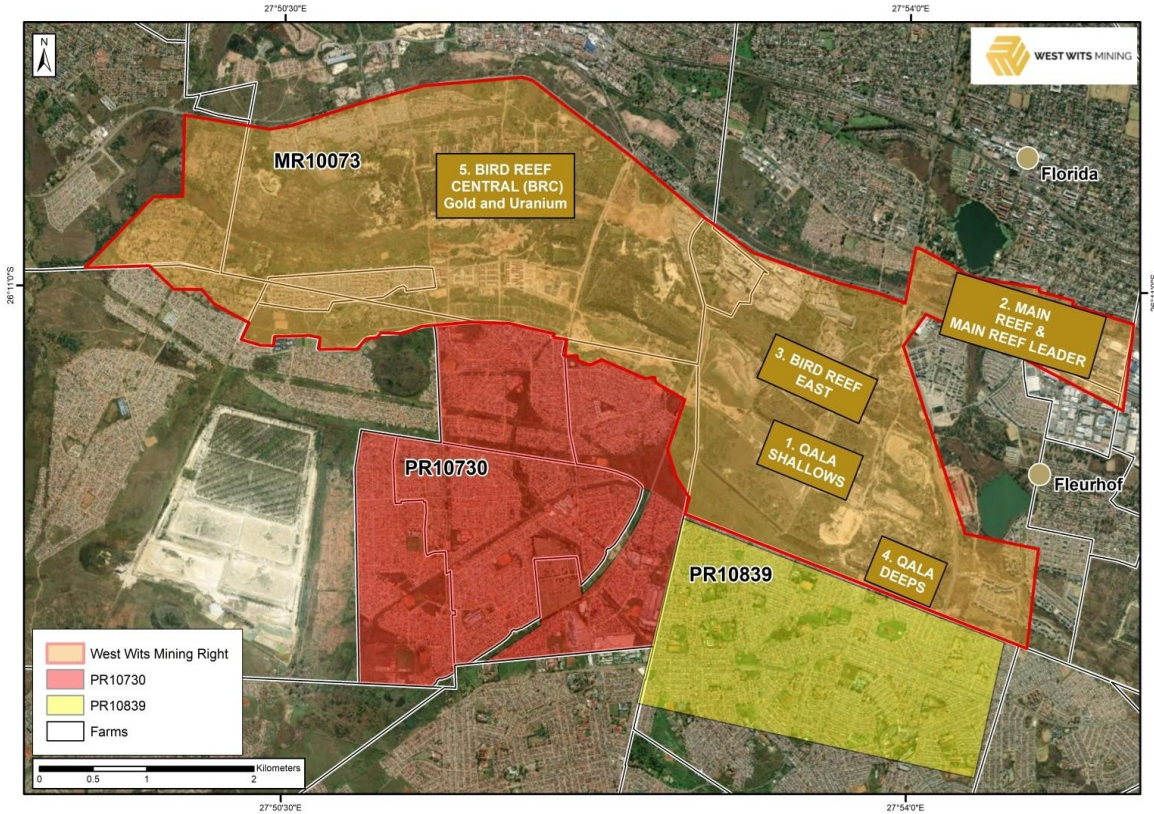

Haulage road	Complete & handed over
Pollution control dam	Advanced stage
Permanent ore handling facility	Advanced stage
2.5MW backup generators	Commissioning Oct-26
Bulk power connection	Planned early 2027

1. Per ASX announcement 7 Oct 2026; 2028–29 outlook and steady-state rate based on Updated DFS (ASX, 23 Jul 2025), which includes Inferred Mineral Resources – see disclaimer.

Scoping Study: a Blueprint for Growth

For personal use only

The Project 200 scoping study is a conceptual blueprint showing how production could potentially scale towards 200,000 oz p.a. production rate from the existing 7.24 Moz Au Mineral Resource[2] base, with uranium-gold upside at Bird Reef Central.

Mining Right – MR10073 (orange); Prospecting Rights – PR10730 (red) & PR10839 (yellow)

PROJECT 200 Scoping Study Completed

A FRAMEWORK FOR LONG-TERM GROWTH

Positive outcome supports continued evaluation of the broader WBP growth opportunity. Scoping Study results provide blueprint towards 200,000 oz production capacity.

Integrated development pathway
Evaluates Qala Shallows alongside the broader Project 200 opportunity.

Staged growth potential
Provides a framework for evaluating future development beyond the current operation.

Optimisation underway
Technical & commercial optimisation continuing

Additional Upside: Bird Reef Central (BRC) Uranium-Gold

Standalone gold-uranium project - **Funded exploration targeting a maiden Uranium Mineral Resource Estimate**.

Existing JORC MRE of 120koz @ 2.66g/t Au[3]

For personal use only

RESPONSIBLE MINING

ESG in action – Jobs, Safety & Local Enterprise

500+ workers on site

Local enterprise

Supporting local SMMEs & community vendors across catering, logistics & site services.

Skills & employment

Learnerships & local hiring are building workforce capability & supporting host communities.

Safety first

Zero-harm ambition supported by formal safety systems, training & continuous review.

Shared value

Ongoing stakeholder engagement aligns mine development with community priorities & local economic participation.

For personal use only

THE FINAL CASE

Derisked Operations in a Mining Friendly Jurisdiction

Proven Geology 7.24Moz @ 4.0g/t Au[2]

Fully Funded Near-Term Low-Cost Producer

Absa & Nedbank, two leading South African institutional banks.

Low AISC - USD 1,289 / oz[1]

First Gold Poured

Qala Shallows poured first gold in March 2026 – production, not a study.

All Approvals in Place

Mining right & environmental approvals are secured for the operating asset.

Toll-treatment: No Plant Build

Ore is processed at Sibanye-Stillwater's Ezulwini plant, removing plant-construction & ramp-up risk.

Jurisdiction Derisked: South Africa, measured on the facts – The sovereign-risk perception, tested against the record*

Political Stability

A peaceful, multi-party democracy for three decades – no coup in its history.

Power & Infrastructure

Load-shedding is now negligible in Johannesburg, after Eskom's 2025 maintenance program

Rule of Law

An independent judiciary on English common-law principles, backed by a free press.

Financial Standing

S&P rates South Africa “BB”, outlook positive (2026); removed from the FATF grey list in October 2025.

The jurisdiction risk priced into West Wits isn't showing up in the record.

** Source: sovereign ratings and public disclosures (S&P, FATF, Eskom), as referenced in West Wits' investor materials.*

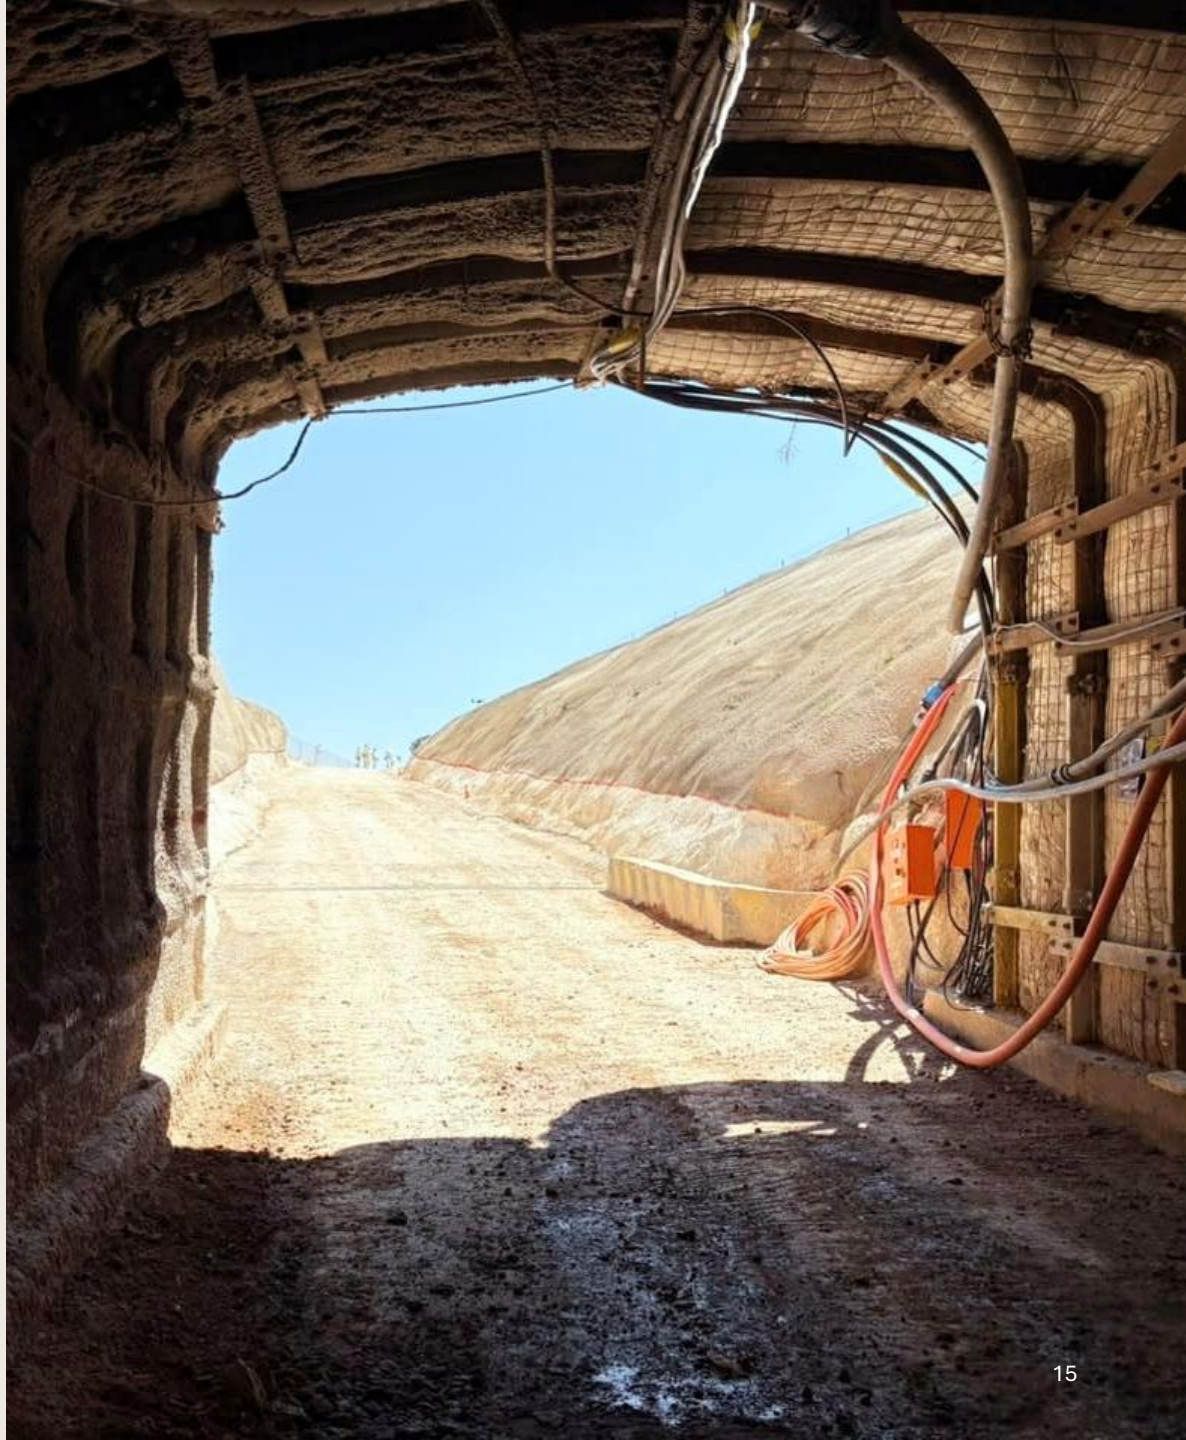

ASX : WWI

Building South Africa's next **mid-tier gold producer.**

THE TEAM

Experienced Team to Deliver The Ramp-up and Growth Plan

Board

Michael Quinert

Chairman (AUS)

ASX-experienced commercial lawyer advising listed miners globally; director of listed & unlisted companies.

Rudi Deysel

CEO / MD (SA)

Mining engineer (MBA); underground, open-cast & multi-commodity production. Ex-Anglo American, Murray & Roberts.

Simon Whyte

CFO / Co. Secretary (AUS)

Chartered Accountant; mining, commodities & logistics. Business transformation & integration expertise. Ex-EY and BP.

SENIOR MANAGEMENT

Makete Thema

Head of Operations (SA)

BSc Mining Engineering & MSc Engineering (Wits); disciplined operational delivery. Ex-Fraser Alexander & Sibanye-Stillwater.

Lindiwe Magidimisa

Head of Projects & BD (SA)

BSc Chemical Eng, PGDip Industrial Eng & MBA; capital projects & assurance. Leadership roles at De Beers, ERG, Deloitte & Anglo.

Tozama Kulati Siwisa

MLI Executive Director | Head of Corporate Affairs (SA)

ESG & transformation leader; ex-Lonmin stakeholder relations. 2025 AAMEG Rising Star.
